Game designer & developer excelling in game conception and design, including narrative, level, and systems design; designing memorable and immersive experiences that leverage the medium. Particular interest in fantasy and action games, RPGs, and platformers. Proficiency in programming and experience across all aspects of development, so able to design with appreciation for implementation, context, etc.

Education

Interactive Media (BSc), *University of York*, 2023-2026

First Class Honours, With Distinction.
91% for Unity 3D level design and game development, 92% for 2D JavaScript game development, 84% for game narrative design, 83% for group game development, 81% for final project (a 3D game prototype with user-research and an essay).
Awards: Department prize for highest second-year average, Cantor prize for highest first-year average. Two games nominated for submission into national competition.

Japanese Program, *Tohoku University*, Summer 2025

Grade AA at highest language level.

Altrincham Grammar School for Boys, 2015-2022

A-Levels: Computer Science (A*), Mathematics (A*), Philosophy (A*).
AS-Levels: Religious Studies (A).
Awards: A-Level Philosophy award for highest A-Level result.

Experience

Designed a diverse range of independent games of different genres and styles, each aimed at developing a particular skill within the broader context of good game design; for example a 2D turn-based game, a 3D platformer, and an open-world narrative action-RPG.

Skills

Game conception, gameplay, narrative, level (3D&2D), UX and accessibility design.
Project planning, leadership, presenting, testing, user research, analysis, and writing.
Game development (Unity, Godot); VR game development; programming (C++, C#, C, Java, Python, HTML, CSS, JavaScript, Kotlin); 3D modelling, texturing, rigging & animating (Blender, Maya); mobile app development (Android Studio); web development; photo & video editing (Adobe Photoshop, Premiere Pro, After Effects).
